PROJECTS

Microcontroller 8051 Based Smoke detectoror.

We were able to test and detect the smoke present in any environment and receive a update via SMS to owner as soon as Smoke is detected eventually preventing any Accidents.

Online Exam Evaluation System using Java

Designed an application which allowed students to register(if not previously registered).Registered students were allowed to login with their passwords and take an online test.The result was generated on submitting the test and displayed on the dashboard.

Audio/Video Player using Flutter

Designed an application which allowed users listening to audio and viewing videos both from local assets as well as the Internet.
